Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3753

This office action is responsive to amendment filed 02/21/2006.

Claims 5 – 19 are pending.

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 6 – 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 6, 7 and 9 depend from the cancelled claim 4. In this office action claims 6, 7 and 9 have been taken to depend from claim 5.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 5 – 8, 11 – 13, 15 - 16 and 18 – 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Karte (US 5,651,385).

Karte '385 discloses an electro-pneumatic controller (Fig. 1) comprising: an electro-pneumatic transducer (4), a shut-down unit comprising a switch (13) in the form of a relay and the shut-down unit operatively coupled to the transducer and configured to respond to a signal received by the controller and to cause the electro-pneumatic transducer to provide a pressure output i.e. depleting the pressure from the actuator (1) thus causing a shut-down. A comparator (2) is disclosed.

Art Unit: 3753

The arrangement disclosed by Karte necessarily performs the method recited in claims 15 – 16 and 18 - 19 in its usual and normal operation.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 9, 10, 14 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Karte as applied to claims 5 – 8, 11 – 13, 15 – 16 and 18 - 19 above, and further in view of Bratland (WO 96/01954).

The patent to Karte discloses the claimed invention with the exception of explicitly disclosing a selector operatively coupled to the shut down unit.

Bratland discloses a control circuit for emergency shutdown that comprises a selector in the form of a manually actuated switch (19) for the purpose of enabling the selective operation of the shutdown unit.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided in Karte a selector in the form of a manually actuated switch for the purpose of enabling the selective operation of the shutdown unit, as recognized by Bratland.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
